

Christian Borgelt studied computer science and physics at the University of Braunschweig, Germany. Having obtained the diploma in computer science in 1995, he worked for a year in the Daimler-Benz Research Center Ulm, Germany. Between 1996 and 2006 he was a research assistant at the University of Magdeburg, Germany. In the year 2000 he obtained his Ph.D. in computer science from the University of Magdeburg with a thesis on "Data Mining with Graphical Models". In 2006 he obtained the *venia legendi* for computer science, also from the University of Magdeburg, with a thesis on "Prototype-based Classification and Clustering". Since 2006 he is a Principal Researcher at the European Center for Soft Computing in Mieres (near Oviedo, Asturias, Spain), where he leads the Intelligent Data Analysis and Graphical Models Research Unit. His research interests include decision and regression trees, association rules, frequent graph mining, clustering algorithms, neural networks and computational geometry.
